

# ROLLER SHADE HARDWIRED RESOURCE

## THINGS TO KNOW

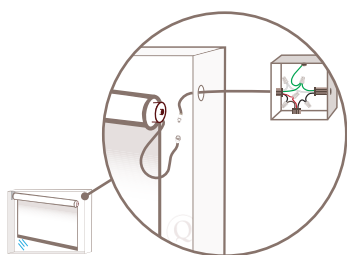

### POWER

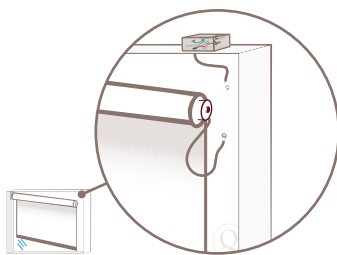

In order to provide power to hardwired roller shades the location will need a Junction Box. This piece needs to be installed prior to our team coming onsite to measure, explore options for location and controls below.

### LOCATION

#### OUTSIDE OF WINDOW

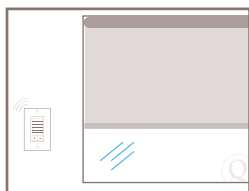

#### INSIDE OF WINDOW

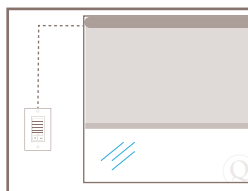

The J-Box can be located behind the drywall on either side of the window or within the window opening.

### CONTROLS

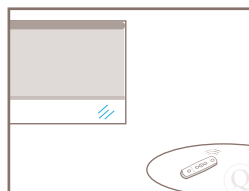

#### WIRELESS WALL SWITCH

#### WIRED WALL SWITCH

#### REMOTE

Our wireless wall switches and remotes should be operated anywhere within 60 feet from the shade window. Our remote controls are battery powered and RTS controlled enabling users to control their window treatments by radio waves.
